

As a subscriber to satellite radio, I support XM and ALL of its programming. Weather and traffic are a must in my business. As a professional driver, up to date and instant information about weather and traffic are a necessity. Not having to search for local stations, and waiting to see if a weather or traffic report are available, is a great asset to me. The wide variety of programming and services are very important to those of us that enjoy variety. I greatly hope that XM is permitted to continue this excellent service.

Sincerely,

Darrell W Boehm
